Orientation of Service Providers & Key Influencers On World Pneumonia Day Part-I Introduction

Background

Pneumonia is the leading single cause of childhood mortality. The disease accounts for 19 per cent deaths in children less than 5 years. Pneumonia kills more children than any other illness, more than measles, malaria and AIDS combined. Globally 156 million new pneumonia cases are reported every year in the developing world. As many as 8.7 per cent of these cases are severe enough to be life-threatening and require hospitalization. India accounts for the maximum 43 million new cases followed by China (21 million cases) and Pakistan (10 million cases). Pneumonia is estimated to kill 410,000 children in India every year.

Haemophilus influenza and Streptococcus pneumonia are the main causes of bacterial pneumonia and estimated to be the causative organisms for more than 50% of all childhood pneumonias. In addition some diseases, like measles and pertussis (whooping cough) can lead to pneumonia as a complication.

It has been shown through various studies that mortality due to pneumonias could be decreased by interventions like prevention of pneumonia through immunization, early diagnosis and optimal case management, exclusive breastfeeding for six months, reducing indoor air pollution, preventive antibiotic treatment in HIV infected children and zinc supplementation.

Understanding the need of generating awareness on pneumonia and its way of prevention a workshop, titled "**Orientation of Service Providers & Key Influencers**" was held under IPAP project.

Objective of Workshop

As said above, one day workshop on World Pneumonia Day, 12 November 2011 was held at Centre for Human Development premises in Chittorgarh. Grassroot health workers were invited in the workshop. The objectives of the workshop can be specified as below:

- Spreading awareness on Vaccine, antibiotics and proper nutrition on serious and fatal pneumonia
- To strengthen health system and improve community involvement.

- Foster collaboration and coordination with grassroots health workers for effective implementation of health schemes.

Participants.

A near about 230 participants were taken part that includes NRHM officials, Public Representatives, NGO representatives, Anganwadi Workers, ASHA, Lactating ladies with their infants and key influencers of villages from Chittorgarh Block.

Programme and Process

The workshop was carried out as per the agenda prepared earlier. There were some changes in the speakers and resource persons due to their busy schedule who invited in it. Understanding the objective discussion was held around below points.

- ✓ Key notes address
- ✓ Some facts on Pneumonia,
- ✓ Symptoms, causes, cure & vaccines,
- ✓ Way of prevention,
- ✓ Responsibility, accountability and contribution of Service Providers in reducing possibility of it.

Resource Materia

The participants were provided health related resource materials for reading which include the copy, pen and State Government notification concerning Pneumonia and other useful information.

Registration

Part II Proceedings

Session 1: Welcome, Introduction and Key Note Address:

Mr. Vinod Kumar Jain, Advocacy Officer, CUTS-Centre for Human Development (CHD), Chittorgarh, welcomed the participants and extended greetings. While sharing the purpose of workshop he indicated towards the need for developing “synergy” between the service providers and civil society organizations to save many children from this fatal disease and prevent mortality and morbidity in children. Stakeholders like government departments, voluntary sectors, community groups, grass root service providers etc, play a vital role in not only comprehensive implementation of the govt. health scheme but also to establish a protective environment for the child, he added.

Mr. Vinod Kumar Jain, Advocacy Officer, CUTS-CHD, Chittorgarh, during his presentation

Sharing the agenda of the daylong Workshop he mentioned that the participants need to use this opportunity to discuss as many issues as they can.

Session II- Reduction in Infant Mortality & Morbidity Rate

Mrs. Praveen, Project Officer, Earth Foundation Udaipur, describing benefits of institutional delivery, urged to contribute in reducing the infant mortality & morbidity rate through making less complications of pregnancy by promoting institutional delivery. Most maternal deaths could be prevented if women had access to appropriate health care during pregnancy, childbirth, and immediately afterwards, she added. Further she suggested some measures to reduce the risks of childbearing for the mother and her baby.

- 1) A woman is healthy and well nourished before becoming pregnant.

- 2) She has regular maternity care by a trained health worker at least four times during every pregnancy.
- 3) The birth is assisted by a skilled birth attendant, such as a doctor, nurse or midwife.
- 4) She and her baby have access to specialized care if there are complications and

Mrs. Praveen from Earth Foundation during her speech

- 5) She and her baby are checked regularly during the 24 hours after childbirth, in the first week, and again six weeks after giving birth.

Session III Pneumonia-Symptoms, Cure, Prevention; Challenges and way forward in the context of reduce cases of Pneumonia

It was most important session for all. Revealing some facts on Pneumonia, Jitendra Ojha, Block Program Manager, NRHM, Chittorgarh, pointed out it most killer disease than AIDS, malaria and measles and any other fatal ailments in children under the age of five years. It can be prevented by immunization, adequate nutrition, proper breastfeeding till 6 month and by addressing environmental factors and can be treated with antibiotics, he opined.

He lamented on the results and outcomes despite of enough human resources. "We are near about 27 lacs health workers in India compare to 4 lacs pneumonia patients. But it is still leading killer disease" he added.

Pneumonia can be spread in a number of ways. The viruses and bacteria that are commonly found in a child's nose or throat can infect the lungs if they are inhaled. They may also spread via air-borne droplets from a cough or sneeze. In addition, pneumonia may spread through blood, especially during and shortly after birth. More research needs to be done on the different pathogens causing pneumonia and

the ways they are transmitted, as this has critical importance for treatment and prevention. Ojha said

“a whole day has been kept for consultation, research and discussion for pneumonia which is enough to understand risk in children on this killer ill” stated Mr. Mithu Lal Jat, UP Zila Parumukh, Chittorgarh. Understanding significance of their role to get success in any

program & schemes, he encouraged them for doing their deeds with honesty, responsibility and accountability.

In the last moments, some workers were invited for sharing of their experiences and challenges during work. All were raised their voice and took pledge for making Chittorgarh clean from pneumonia through generating awareness in their respective areas on it and promote complete immunization and methods of proper breastfeeding till require time.

A grass root service provider Sharing her experiences

Lady Supervisors from Department of Woman & Child Development and some other CUTS representatives also put their views.

Understanding the more potential of pneumonia during winter season CUTS decided to distribute woolen caps (collected Save the Children, Jaipur) to excluded children of IPAP purview. Honorary guests initiated the campaign and put some caps on infants' heads.

Honorary guests distributing woolen Caps to infants

Valedictory Session:

While concluding the session Mr. Madan Giri Goswami said that very soon the all IEC material related to pneumonia shall be shared with the all stakeholders. He reiterated the need to have continuous dialogue with the community, and administration at different level to foster a strong coordination so that many children could be saved every year. He expressed his happiness that the all service providers are very positive on possible contribution in reducing no. of cases.

Madan Giri Goswami, Senior Community Organizer, During Valedictory Session

He expressed hope that the all stakeholders would accelerate implementation of govt. health schemes and complete immunization in the district and would respect the suggestions came out of this meet.

At the end, Vinod Kumar Jain, Advocacy Officer, CUTS-CHD extended Vote of thanks to the participants, government representatives and others for making the workshop a successful one.

तन-मन से की गई सेवा ही बनती है पहचान

भास्कर न्यूज, चित्तौड़गढ़

कर्तव्यों का निर्वहन तन-मन व निस्वार्थ करने पर ही अच्छे सेवा प्रदाता के रूप में पहचान बन सकती है। उक्त विचार कट्स द्वारा विश्व निमोनिया दिवस पर शनिवार को आयोजित सेवा प्रदाताओं की आमुखीकरण कार्यशाला में मुख्य अतिथि उप जिला प्रमुख मिट्टलाल जाट ने व्यक्त किए।

कट्स के एडवोकेसी ऑफिसर विनोद जैन ने बताया कि सेव द चिल्ड्रन के सहयोग से संचालित प्ररियोजना के तहत विश्व निमोनिया दिवस पर सेवा प्रदाताओं की जानकारी बढ़ाने व निमोनिया से मरने वाले बच्चों की संख्या में कमी लाने के उद्देश्य से यह कार्यशाला आयोजित की गई। एनआरएचएम के ब्लॉक कार्यक्रम प्रबंधक जितेंद्र ओझा ने निमोनिया से बच्चों की सुरक्षा
