

### **Two days district level training on Annual Status of Education Report (ASER)**

Annual Status of Education Report (ASER) two days district level training for volunteers on conducting survey was organised on October 11-12, 2018 at CUTS Centre for Human Development office Chittorgarh. The Annual Status of Education Report, or ASER, supported by Pratham is the largest citizen-led annual survey of children in rural India. The survey seeks to understand children's status of schooling and basic learning. In addition to this, with the New Education Policy coming out soon, it will be important to continue our focus on children's basic learning levels, as we have been doing previously.

After the training, 30 randomly-selected villages will be surveyed in each district. In each sampled village, 20 households will be randomly chosen. In these 20 households, all children in the age group of 5-16 years will be assessed on basic reading and arithmetic, as well as the application of these skills in some everyday tasks. During the event total 28 surveyors attended in the training.
